II. Amendment Information

Proposed Amendments to the (please tick the box):

☐ WESM Rules ☐ Retail Rules

- ☒ Market Manual:
1. Registration, Suspension and De-Registration Criteria and Procedures Manual *(in reference to the version that is still pending with the Department of Energy as of the date of the submission of the rules change request)*
 2. WESM Penalty Manual

Topic: Proposed Rule Amendments Relating to Test and Commissioning Penalty Framework

Proposed Classification of Amendments (please tick the box):

☒ General ☐ Minor ☐ Urgent

If Urgent, reason for urgency:

—

Philippine Electricity
Market Corporation

III. SUMMARY OF THE PROPOSED RULES CHANGE

The proposed rules change covers the penalty mechanism for the following acts or omission of a trading participant with facility or plant whose test and commissioning period has expired:

- a. Failure of the registered WESM Member to apply for commercial operations registration after receiving the Certificate of Compliance (COC) or the Provisional Authority to Operate (PAO).
- b. Generation after expiry of authorized test and commissioning period unless otherwise authorized by the relevant DOE issuances, Market Rules or Manuals.

The proposal covers the following aspects: (a) area/subject of the enforcement; (b) trigger of enforcement proceedings; and (c) enforcement actions.

This proposal, however, does not cover any revisions to the rules pertaining to the enforcement proceedings, as the existing process relating to monitoring and investigation under the Enforcement and Compliance Manual are adequate to cover other related enforcement proceedings and may, thus, be applied to the subject proposal.

IV. BACKGROUND

The Department of Energy (DOE) issued the Department Circular DC2021-06-0013 “Adopting a General Framework Governing the Test and Commissioning of Generation Facilities for Ensuring Readiness to Deliver Energy to the Grid or Distribution Network” on 03 June 2021. In issuing the said circular, the DOE considered, among other things, the following, the citation of which is relevant in the discussion of the subject proposal –

- Thirty-eight (38) plants were recorded to be on test and commissioning status in the WESM for more than two (2) months, the longest being five (5) years, as of 01 April 2020;¹ and
- The extended test and commissioning of generation facilities pose a material effect on the WESM outcomes particularly in displacing scheduled generators affecting

¹ 9th Whereas Clause of DOE DC2021-06-0013

Philippine Electricity
Market Corporation

the competitiveness in the WESM while being exempted from the mandatory requirements of submitting offers or projected outputs.²

The DOE DC2021-06-0013 provided for the clear-cut procedures and timeline for the conduct of test and commissioning. It also provided for the possible consequences in case a generation facility beyond the authorized period for test and commissioning, as follows –

- There will be no overriding constraints by the System Operator while awaiting the commercial operations;
- There will be no bilateral contract quantity (BCQ) declaration and no WESM payments for any injected energy; but the energy withdrawn from the grid or distribution network will be charged to the concerned generation company.

However, there are yet no sanctions provided in any rules or market manuals for any act or omission of the generation company relative to the obligations and/or prohibition set forth in the said DOE issuance. Thus, it mandated the WESM Governance Arm to prepare and submit proposed changes to the WESM Rules and relevant Market Manuals in accordance with the enforcement and compliance policy,³ and to review and recommend to the DOE and ERC possible sanctions and other measures that will promote compliance of concerned stakeholders to the policies stated in DOE DC2021-06-0013.⁴ Hence, this proposal.

The Philippine Electricity Market Corporation (PEMC) through the Market Assessment Group (MAG) and the Enforcement and Compliance Office (ECO) and in consultation with the Compliance Committee (CC)⁵ and the Market Surveillance Committee (MSC)⁶, has conducted a study that focuses on the penalty framework for these two (2) area/s or subjects of enforcement:

- a. Failure of the registered WESM Member to apply for commercial operations registration after receiving the COC or PAO;

This presupposes that the test and commissioning activities have already been concluded and the appropriate certification from the ERC has already been obtained by the concerned generation company; but for any or unknown reason/s,

² 10th Whereas Clause of DOE DC2021-06-0013

³ Section 9.1 of the DOE DC2021-06-0013

⁴ Section 9.3 of the DOE DC2021-06-0013

⁵ Compliance Committee 1st Regular Meeting, 15 December 2021

⁶ Market Surveillance Regular Meetings (2021-13 and 2022-05), 16 December 2021; and 17 March 2022

Philippine Electricity
Market Corporation

the said company nevertheless failed or refused to be registered in the WESM under a commercial operation status.

- b. Generation after expiry of authorized test and commissioning period unless otherwise authorized by the relevant DOE issuances, Market Rules or Manuals.

This would cover a situation where a generator, despite having an expired test and commissioning status, would generate or inject energy to the grid in violation of the rules set in DC2021-06-0013.

The study on penalty framework or mechanism was also presented, discussed, and consulted with the following stakeholders:

- a. With the ERC on 21 December 2021
- b. With the DOE on 23 December 2021
- c. With the Generation Companies on 12 January 2022

The same study was also submitted for comments to the PEMC Management on 30 March 2022.

V. THE PROPOSED RULES CHANGE

A. Market Manuals

Area/s of Rule Amendments	Description	Market Manuals to be Amended	Recommending Committee
1. Subject of Enforcement	a) Failure of the registered WESM Member to apply for Commercial Operations Registration after receiving the Certificate of Compliance (COC) or the Provisional Authority to Operate (PAO)	Registration, Suspension and De-Registration Criteria and Procedures Manual Note: The version used for this purpose is the latest version (<i>now pending with the DOE</i>)	Rules Change Committee (RCC)

Area/s of Rule Amendments	Description	Market Manuals to be Amended	Recommending Committee
	b) Generation after expiry of authorized test and commissioning period, and while awaiting the issuance of COC/PAO		
2. Trigger of Enforcement	a) Report of Probable Breach from the Market Operator b) <i>Motu proprio</i> investigation of ECO	Registration, Suspension and De-Registration Criteria and Procedures Manual	RCC
3. Enforcement Action	a) Determination of Penalty Level In relation to Frequency of Occurrence	WESM Penalty Manual 1.0 <ul style="list-style-type: none"> • Schedule of Breaches and Penalty • Frequency of Occurrence Matrix 	Market Surveillance Committee (<i>in consultation with RCC</i>)

B. WESM Rules

The generation company with a facility or plant on test and commissioning status, as registered in the WESM, is considered a WESM Member within the meaning of the WESM rules; and shall, for all intents and purposes, be covered by the enforcement proceedings and actions under Section 7 of the WESM Rules. **No revision to the WESM Rules** is, thus proposed, as the proponent finds the following provision (and other related provisions in the WESM Rules) adequate as far as the coverage of the subject entity is concerned –

Philippine Electricity
Market Corporation

“7.2.2.5 The enforcement proceedings and enforcement actions set out in this Clause 7.2 may only be carried out **for non-compliances of a WESM Member** with the WESM Rules or Market Manuals as specified in the WESM Penalty Manual, or in any provision of the WESM Rules or any Market Manual which are subject of sanctions or investigation under this Clause 7.2.” (emphasis ours)

The focus, therefore, of the subject proposal is the revision to the abovementioned Market Manuals to ensure that the relevant act or omission constituting a breach is clearly specified and identified, as to fall under the ambit of the enforcement provisions of the WESM Rules and relevant market manuals.

C. Considerations in Submitting the Proposal to RCC and MSC

In submitting the subject proposal to both the RCC and the MSC, the proponent is guided by the following guidelines, as stated in the WESM Rules:

1. Proposals for Changes to the WESM Rules or Market Manuals, or Adoption of New Market Manuals

“The Market Operator, the Government, any WESM member or other interested parties may submit proposals for changes to the WESM Rules or Market Manuals, or for the adoption of new Market Manuals **to the Rules Change Committee**.”⁷ (emphasis ours)

2. Review of the Penalty Manual

“The **Market Surveillance Committee** shall review the WESM Penalty Manual from time to time as may be necessary, and **in consultation with the Rules Change Committee**, Compliance Committee and the PEM Board, recommend changes thereto, provided, that changes on the same shall be subject to the approval of the DOE.”⁸ (emphasis ours)

⁷ Clause 8.3.1 of the WESM Rules

⁸ Clause 7.2.5.5 of the WESM Rules

Philippine Electricity
Market Corporation

The WESM Penalty Manual also provides that “[t]he **Market Surveillance Committee** shall design the penalty levels and appropriate range of penalties that will be applied for breaches of the WESM Rules. **This is to be done in consultation with the Rules Change Committee and the PEM Board.** The penalty levels and ranges are to be reviewed by the Market Surveillance Committee from time to time and as may be necessary.”⁹ (emphasis ours)

As the revisions or amendments are interrelated, the proponent presents them altogether to see how the provisions as set in different market manuals – the Registration, Suspension and De-Registration Criteria and Procedures Manual and the WESM Penalty Manual – would complement each other towards a common objective, as discussed herein.

Lastly, the subject proposal is being submitted and presented to the Market Surveillance Committee in consideration of the following guidelines,¹⁰ as stated in the WESM Rules:

- a. The acts or omissions constituting breach of the WESM Rules or Market Manuals for which penalties can be imposed must be specified.
- b. The penalties, financial and non-financial, that can be imposed for each type of breach should be commensurate to the nature and gravity of the breach.
- c. The procedures for and respective obligations of responsible persons or entities in implementing penalties must be specified.

VI. BACKGROUND AND DESCRIPTION OF THE PROPONENT

The proponent is the Philippine Electricity Market Corporation with its officers as follows:

Leonido J. Pulido III – President

Elvin Hayes E. Nidea – Chief Governance Officer

Marydette C. Jocson – Corporate Services Department Head

Marian Venussa S. Dela Fuente – Corporate Secretary / Legal Department Head

⁹ Section 1.1.3 of the WESM Penalty Manual 1.0, effective 23 October 2021

¹⁰ Clause 7.2.2.5 of the WESM Rules, as amended by DOE DC2021-08-0026, effective 23 October 2021

John Mark S. Catriz – Market Assessment Group Head
Ma. Hazel M. Gubaton-Lopez – Enforcement and Compliance Office Head
Elaine D. Gonzales – Internal Audit Head
Clares Loren J. Jalocon –Corporate Planning and Communications Head
Patrick S. Fernandez – Information System and Technology Head

VII. CONCLUSIONS AND RECOMMENDATIONS

The amendments to the Registration, Suspension and De-Registration Criteria and Procedures Manual and the WESM Penalty Manual are proposed to implement the directives under Section 9.1 and 9.3 of the DOE DC2021-06-0013 entitled “Adopting a General Framework Governing the Test and Commissioning of Generation Facilities for Ensuring Readiness to Deliver Energy to the Grid or Distribution Network”. Thus, it is recommended that the proposed changes be adopted.

Count	Interval	Generation (MW)	Penalty	Penalty Level	Penalty Amount
31	10:30	19	200	Level 2	3,800.00
32	10:35	20	200	Level 2	4,000.00
33	10:40	12	200	Level 2	2,400.00
34	10:45	8	200	Level 2	1,600.00
35	10:50	5	200	Level 2	1,000.00
36	10:55	10	200	Level 2	2,000.00
Total					61,400.00

Note: The Penalty Amount would vary depending on extent of violation measured in terms of capacity generated, i.e., the actual generation (MW) (Column C)
