REQUEST FOR MARKET RULES AND MANUALS AMENDMENTS

Proposals made only under this prescribed form shall be accepted and considered as submitted.

This request for amendments should be submitted to:

Rules Change Committee

Attention: WESM Governance Committee Secretariat
Philippine Electricity Market Corporation
18/F Robinsons Equitable Tower
ADB Avenue, Ortigas Center
Pasig City, 1605 Philippines
Email address: mag_rrd@wesm.ph

[In accomplishing and submitting this form, you give your consent for PEMC to collect, record, organize, and update your personal data as herein provided as part of your information for purposes of rules change process.]

I. Proponent's Information

Name	Elvin Hayes E. Nidea
Designation	PEMC President and WESM Governance Officer
Company	Philippine Electricity Market Corporation Independent Electricity Market Operator of the Philippines, Inc.
Company Address	18F Robinsons Equitable Tower, ADB Ave.
	Ortigas, Pasig City 1600
Telephone No.	8631 8734
Email Address	eenidea@wesm.ph ; rcbalegre@wesm.ph ; OP < op@wesm.ph >

II. Amendment Information

Proposed Amendments to the (please tick the box):

WESM Rules Retail Rules

Market Manual: **Ancillary Services Monitoring (ASM) Manual 1.0; and
Penalty Manual 3.0**

Topic: **Amendments to Certain Provisions Regarding the
Reserve Conformance Standards and Related
Enforcement Actions**

Proposed Classification of Amendments (please tick the box):

General Minor Urgent

If Urgent, reason for urgency:

- To avoid, reduce the risk of, or mitigate the unintended adverse effect of the relevant provisions of the Ancillary Services Monitoring (ASM) Manual, and the Penalty Manual before the actual implementation of the enforcement actions, i.e., the adjustment in, or deduction from, the Reserve Trading Amount as a result of breach of the Reserve Conformance Standards

III. SUMMARY OF THE PROPOSED RULES CHANGE

The following are covered in the proposals:

1. Clarification on, and correction of, the criteria and formulas relating to compliance with the Reserve Conformance Standards (RCS) which include the following:
 - For Regulating Reserve and Contingency Reserve:
 - Revision/Correction of some of the formulas and parameters in measuring *Response Time* and *Response Accuracy* for reserves on Governor Control Mode (GCM) and on Automatic Generation Control (AGC) Mode
 - Clarity on the deadband requirement
 - Change from monthly to hourly averaging of *Response Accuracy* and *Response Time*
 - For Dispatchable Reserve:
 - Additional criteria for the “*Sustainability*” requirement applicable to the provision of the Dispatchable Reserve.
2. Clarity on the basis of the Ancillary Service Providers in submitting the Request for Reassessment with Notice of Claim.
3. Clarity in the responsibilities of the Market Operator, the WESM Governance Arm, and the System Operator regarding the data provision, flagging, determination, and reporting of breach.
4. Remove inconsistency in the penalty application for Reserve Offer Capacity Compliance (ROCC) between the Ancillary Services Monitoring (ASM) Manual and the WESM Penalty Manual.

IV. BACKGROUND

Rules Change Proposal Relating to Reserve Market Compliance

In October 2023, the Philippine Electricity Market Corporation (PEMC), in coordination with the Independent Electricity Market Operator of the Philippines, Inc. (IEMOP), submitted the rules change proposal concerning the *Reserve Market Compliance and Related Enforcement Actions* to the Rules Change Committee (RCC) in compliance with Section 1.2.1 (a) of the Department Circular DC-2023-

09-0026¹ which mandated the WESM Governance Arm to finalize the reserve market compliance guidelines and to submit the same to the DOE for approval not later than 15 November 2023.. The RCC resolved to approve the Proposed Urgent Amendments to the WESM Rules, the new WESM Manual on Ancillary Services Monitoring, and the WESM Manual on Dispatch Protocol on 23 October 2023. (RCC-RESO-23-10).

On 09 November 2023, the WESM Governance Arm through the PEM Board, submitted to the DOE for final approval the aforesaid rules change proposal with additional provision allowing a six-month relaxation period for the imposition of penalty.

Commercial Operation of the Reserve Market

On 26 December 2023, the Pilot stage of the Reserve Market Commercial operations commenced wherein the scheduling and dispatch involve only the contracted AS providers. On 26 January 2024, the full commercial operation of the Reserve Market commenced. At that time, the ASM Manual had not been promulgated by the DOE. During the commercial operation, the “*Supplemental Operating Guidelines for the Commercial Operations of the Reserve Market*” issued by the DOE governed the Reserve Market.

Under the said Guidelines, the National Grid Corporation of the Philippines (NGCP)-System Operator was tasked, in the interim, to monitor the compliance of the Ancillary Service Providers (ASPs) in the Reserve Market based on the System Operator’s own compliance standards as currently being applied to contracted reserves.

Simulation of RCS Monitoring with Notable Observations

Meanwhile, the PEMC through the Enforcement and Compliance Office (ECO) had conducted mock-ups or simulations of the RCS monitoring in preparation for the full implementation of the ASM Manual. In the course of simulations, the PEMC-ECO saw the need to address some gaps or inconsistencies in some provisions of the proposed ASM Manual.

On 28 February 2024, the PEMC submitted to the DOE additional provisions to the Ancillary Services Monitoring (ASM) Manual that would further clarify the counting of breaches of the RCS. Such proposed additional submissions were considered

¹ “Declaring the Commercial Operations of the Reserve Market and Providing Further Polices,” 26 September 2023

by the DOE in the final/approved version of the ASM Manual which came out in June 2024.²

The Reserve Market was, however, suspended beginning March 2024 Billing Period following the Energy Regulatory Commission (ERC) Order directing the suspension of the implementation of Section 8 on Billing and Settlement of the Price Determination Methodology (PDM) for the Reserve Market.

Promulgation of the ASM Manual

On 24 June 2024, the DOE promulgated the Department Circular DC-2024-06-0019, *“Adopting further amendments to the Wholesale Electricity Spot Market (WESM) Rules and WESM Manual on Dispatch Protocol, and creation of WESM Manual on Ancillary Services Monitoring regarding Reserve Market Compliance and related Enforcement and Actions,”* by publishing the same in the Business Word and the Philippine Star. It became effective on 09 July 2024; at which time, the Reserve Market was still suspended.

The Need for Further Amendments to the ASM Manual

While the ASM Manual was still pending review by the DOE, and while the Reserve Market was still suspended (from March to June 2024), PEMC-ECO continued its simulation using the actual data of some ASPs and held a series of coordination meetings with both the NGCP-System Operator and IEMOP. The parties agreed that, based on the simulation results, there were a few items or provisions in the proposed ASM Manual that need further revisions in order to arrive at a correct and more reasonable and objective determination or measures for the *Response Time*, *Accuracy*, and *Sustainability* metrics for a specific type of reserve and mode of operations.

In light of these developments, the PEMC seeks the approval of its Request for Urgent Amendments to the ASM Manual. The proposal would:

1. Ensure appropriate, correct, and complete measures in determining *“Response Time,” “Response Accuracy,”* and *“Sustainability”* measures in the RCS by revising or correcting the relevant formulas and parameters and adding specific metrics thereto.
2. Ensure a more balanced breach determination of the RCS by changing the horizon of averaging for purpose of determining the compliance with *Response Accuracy* and *Response Time*.

² Additional Provisions considered by DOE during its review of the ASM Manual: Sections 2.1 (h); 5.3.7, 5.3.8, 5.4.8, and 5.4.9 of the ASM Manual.

3. Further streamline the monitoring process by transferring the responsibility of flagging of breach from the Market Operator to PEMC-ECO and removing the reconciliation procedure to avoid any potential conflicts during the reconciliation of results.
4. Harmonize the penalty mechanisms between the ASM Manual and the Penalty Manual as regards the Reserve Offer Capacity Compliance (ROCC).
5. Address the gap between the process for adjusting the Reserve Trading Amount and for the filing of the Request for Reassessment with Notice of Claim.

Urgency of the Proposal

With the resumption of the Reserve Market effective 05 August 2024 as declared through DOE Advisory 2024-08-001-SEC dated 02 August 2024, and the effectivity of the ASM Manual, the PEMC-ECO is mandated to conduct compliance monitoring and to provide the results thereof to IEMOP as basis for the Reserve Trading Amount adjustments.

PEMC-ECO will need to submit the RCS monitoring results (*based on the corrected formula*) to IEMOP for practical purposes especially that the compliance monitoring of the RCS would already cover 05 August 2024 transactions and onwards.

PEMC and IEMOP would need to have a legal basis for applying the Reserve Trading Adjustment based on the corrected formula in determining the *Response Time, Response Accuracy, and Sustainability*. Absent such legal basis, the IEMOP may need to defer the deduction or adjustment in the Preliminary Settlement Statement. Such a situation may lead to the non-implementation of the following provision of the ASM Manual.

The PEMC files this Urgent Amendment to the ASM Manual in reference to Section 3.1 (c) and (d) of the *Procedures for Changes to the WESM Rules, Retail Rules and Market Manuals* and based on the following:

Reference	Provision	Description
Section 3.1 (c)	Avoid, reduce the risk of, or mitigate the <u>unintended adverse effect</u> of the ASM Manual and Penalty Manual	Possible Adverse Effect: <ul style="list-style-type: none"> • For ASM Manual: Incorrect/unreasonable results or findings of Breach of RCS with financial implication • For Penalty Manual: Confusion on the penalty application for Breach of RCS with financial implication

Section 3.1 (d)*	Facilitate the implementation of the WESM Rules and the ASM Manual.	<ul style="list-style-type: none"> To fairly implement Section 7.7.1 of the ASM Manual requiring the IEMOP to reflect in the adjustments based on the report submitted by ECO.
------------------	---	---

The filing of this urgent rule amendment is deemed necessary to ensure that the identified issues are addressed before the actual implementation of the enforcement actions, *i.e.*, adjustments in the Reserve Trading Amount, and the imposition of penalty.

V. THE PROPOSED RULES CHANGE

A. WESM Ancillary Services Monitoring Manual

Area/Subject of Amendment	Brief Description
Response Accuracy and Response Time on Governor Control Mode (GCM) and Automatic Generation Control (AGC) Mode	Provides for - <ul style="list-style-type: none"> Appropriate way to determine Response Compliance measures. Revised formula for computing the Response Accuracy Revised horizon of averaging the Response Accuracy and Response Time Added specific metric to complete the metrics in determining the Response Time
Reserve Conformance Standards for Dispatchable Reserves	Provides additional requirements in the determination of breach for Dispatchable Reserves.
Settlement Amount Due from the System Operator after Monitoring	Provides a more streamlined process in the filing of the Request for Reassessment with Notice of Claim.
Provision of Data for Monitoring and Reporting	<ul style="list-style-type: none"> Inclusion of WESM Governance Arm in the direct data transmission. For a clear understanding and delineation of the functions, roles, and responsibilities of the Market Operator, the System Operator, and the WESM Governance Arm.

B. WESM Penalty Manual

Area/Subject of Amendment	Brief Description
Schedule of Breach and Penalties	Removed “reserve offer” on the section for the breach for both the generation and reserve offer, in view of the specific rule pertaining to sanctions for breach of the ROCC under Section 8 of the ASM Manual.

VI. BACKGROUND AND DESCRIPTION OF THE PROPONENT

Philippine Electricity Market Corporation, acting as the Governance Arm of the WESM with its officers as follows:

Elvin Hayes E. Nidea – President
Andrea J. Mendiola – Legal Department Head
Bienvenido C. Mendoza – Market Assessment Department Head
Ma. Hazel M. Gubaton-Lopez – Enforcement and Compliance Department Head
Elaine D. Gonzales – Internal Audit Department Head
Patrick S. Fernandez – Information System and Technology Department Head
Herbie C. Ngirngir - Finance and Internal Relations Department Head

VII. CONCLUSIONS AND RECOMMENDATIONS

The amendments to the Ancillary Services Monitoring Manual and the WESM Penalty Manual are proposed for the efficient and effective compliance and enforcement proceedings in relation thereto. Thus, it is recommended that the proposed changes be adopted.
