

# DISPUTE RESOLUTION ADMINISTRATOR ACCOMPLISHMENTS

(JUNE 2006 – DECEMBER 2020)

July 2021

Zoom

A Premier Electricity Market & Champion of Governance

# THE DISPUTE RESOLUTION ADMINISTRATOR

---

The current Dispute Resolution Administrator (DRA) is **Atty. Jesusito G. Morillos**. Serving with him, on an on-call basis, are about 30 well-experienced Mediators and Arbitrators, most of whom are well-known internationally for their advocacy on arbitration and other dispute resolution modes.

# ACCOMPLISHMENTS: FEW COMMERCIAL DISPUTES

---

- Over the past ten (10) years, we had only two (2) Arbitrations which is good for the Market, as disputes are disruptive of the Market and/or the economy.
- Commercial Disputes - either borne out of a Market Transaction or as a byproduct result of a violation of the WESM Rules. These are not the disciplinary type that is an exercise of the State's police power and implementable through the PEMC Governance Committees.

# ACCOMPLISHMENTS: DISPUTE AVOIDANCE MEASURES

---

**Dispute Avoidance Measures** Review of the WESM Rules and Manuals for imperfections that could be sources of disputes.

# ACCOMPLISHMENTS: DISPUTE AVOIDANCE MEASURES

---

**Implementation of the Dispute Management Protocol** - Market Participants are led or encouraged to resolve their controversies privately or internally among themselves, to the effect that controversies do not quite escalate into full blown disputes.

# ACCOMPLISHMENTS:

---

- **Expeditious and Cost-efficient Resolution of WESM Disputes**
  - Emergency Arbitration
  - Guidelines on Virtual Hearings
- **Dispute Resolution for Particular Needs of the Market**
  - Renewable Energy Market Dispute Resolution Manual
  - Final Offer Arbitration or Pendulum Arbitration - for disputes arising from transactions in the Retail Market.
